Newly submitted claims 28-32 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The original claims were product claims and process of using the product claims, which are outside of the realm of new claims 28-32, which call for a deodorizing treatment process.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 28-32 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Orthoefer for reasons of record.

Applicant urges that the claim is not anticipated by the reference because the reference does not deodorize the product. This argument has

been considered but is not persuasive because the claims are directed to a product and not to a deodorization process. One of ordinary skill in the art would not anticipate that the product of Orthoefer would have an odor because the components of the composition are not volatile.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bertoli as further evidenced by Orthoefer and Swern taken together for reasons of record.

Applicant urges that the claim is not anticipated by the reference because the reference does not deodorize the product. This argument has been considered but is not persuasive because the claims are directed to a product and not to a deodorization process. One of ordinary skill in the art would not anticipate that the product of Bertoli would have an odor because the components of the composition are not volatile.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
